GRADE APPLICATIONS
• Metal polishing abrasive
• Lightweight snow/ice traction aid
• Water filtration media in pool-filtration and other tank-type filter systems

PACKAGING OPTIONS
• 1 or 2 lb resealable bags
• 20 lb [9 kg] box
• 35 lb [15.8 kg] bags
• 900 lb [408 kg] super sacks (palleted)
• 1800 lb [816 kg] super sacks (palleted)
• Bulk shipped in rail car or tractor trailer

ORDER
• Samples, small quantities, and single production bags (up to 3): order direct from the PumiceStore.com
• Partial pallets, full pallets, truckloads: contact us at sales@hesspumice.com or call 208-766-4777

PUMICE TECHNICAL DATA
Chemical analysis, physical properties, and other common data shared by all Hess Pumice grades are detailed on back.

Left: HP Grade number 7. Right: Grade used for as an aggressive filtration media (replacing or supplementing sand, zeolite, or diatomaceous earth) in commercial and residential pool filtration systems.

Hess Pumice

Mining and refining the purest commercial deposit of white pumice on the planet.
Hess Pumice Technical Data

**COMPOSITION AND PHYSICAL PROPERTIES**

**Chemical Name:** Amorphous Aluminum Silicate

### TYPICAL ANALYSIS

- Silicon Dioxide: 76.2%
- Aluminum Oxide: 13.5%
- Ferric Oxide: 1.1%
- Ferrous Oxide: 0.1%
- Sodium Oxide: 1.6%
- Potassium Oxide: 1.8%
- Calcium Oxide: 0.8%
- Titanium Oxide: 0.2%
- Magnesium Oxide: 0.05%
- Moisture: <1.0%
- Crystalline SiO₂: None Detected

### GENERAL PROPERTIES

- Appearance: White powder
- Hardness (Mohs): 6
- pH: 7.2
- Radioactivity: None
- Softening Point: 900 degrees C
- Water Soluble Substances: 0.15%
- Loss on Ignition: 5%
- GE Brightness: 84
- Specific Gravity: 2.2
- Reactivity: Inert
  (except in the presence of calcium hydroxide or hydrofluoric acid)

**DESCRIPTION**

Amorphous (non-crystalline) in structure and composed primarily of aluminum silicate, pumice is a naturally calcined volcanic glass foam consisting of highly vesicular strands permeated with tiny air bubbles. It is these frothy, friable glass vesicles that, when carefully refined to various grades, give pumice its unique and infinitely useful qualities.

**NOTES**

- Chemical analysis and physical properties provided are common to all raw Hess pumice grades.
- **Grade Variety.** The natural, hard-yet-friable character of our pumice combined with our crushing and screening expertise allow us to offer pumice grades and grade blends down to 3 microns.
- **Safe to Use.** No hazardous crystalline structure: testing for crystalline silica (airborne particles of respirable size) finds no measurable Crystalline Silica (SiO₂) present. Free of heavy metals, pesticides, nano-particles, allergens. Certified organic input material.
- **Purity:** As the result of centuries of wave action from a now-extinct inland sea, our pumice is remarkably pure. Our mine grades are typically comprised of 98% pumice and 2% other igneous minerals, which are not removed through our mining processes.
- **Storage:** Keep dry and protected from the elements until use.

---

Pumice is a foamed glass stone naturally expanded by explosive volcanic eruption.
